Founder and Forensic Technician of Legal Audio Video, the forensic services division of Audio Paint, Ltd. Professional forensic services include; audio/video enhancement, analysis, authentication, image extraction, document preparation, consultation, expert testimony in Federal, State and Local courts throughout the United States and the world. Clients include Government Agencies, Private Law Firms, Investigative Agencies and others. As president, I am responsible for the overall operations of a fully equipped, digital work space/office featuring cutting-edge software, hardware, acoustic listening environments, analog machinery and portable recording devices.

Legal Audio Video also provides presentation and editing services during trial, on-site audio and video recording services, archiving, conversion and digitization of “tape” evidence. Legal Audio Video offers remote equipment packages and support for on-location and courtroom playback. We are AGCV certified to record and validate video depositions. Clients include; Federal Agencies, Federal Prosecutors, State Agencies, State Prosecutors, Private Law Firms, Public Defenders, Investigative Agencies, Insurance Carriers and others.

## SERVICES

Our skillset is constantly evolving based on the volume of material we process. Newer audio and digital formats are being introduced on a yearly basis. Legal Audio Video is performing the research and obtaining the proper certifications needed to advance our knowledge as forensic experts. There is a considerable amount of digital, audio and video evidence attached to cases produced within the U.S. We firmly believe that no other private, forensic audio/video firm in the Northeast can match our experience, background and depth of services. Legal Audio Video has a reputation as a preferred, trusted vendor for many Federal, State and City agencies.

- Enhancement of thousands of hours of poorly recorded audio, body-wire recordings, cell phone recordings, internet uploads, cell phone intercepts and 911 conversations in both digital and analog (tape) formats.
- Enhancement of thousands of hours of video footage captured by surveillance and security camera systems, cell phones, dash-cam units, body-worn devices and social media sites.
- Image extraction and image enhancement taken from of surveillance and security video footage, cell phone recordings and numerous camera/video devices.
- Analysis of thousands of hours of audio and video evidence to confirm the digital chain-of-custody, recording unit, software and protocol used to capture, record and archive each file.
- Authentication of thousands of hours of audio and video evidence to determine the presence of deletion, tampering and editing. Written documents and final reports created for client review.
- Preparation and presentation of audio and video materials for trial and review. Depositions and Expert testimony taken in courts throughout the United States.
- Access and experience using Zoom, Microsoft Teams and other online, streaming platforms.
- Digitization and conversion of thousands of audio and video files made from proprietary and/or analog sources to universal digital formats. Import and conversion of various online postings and materials to universal formats.

## **CLIENTS**
